SENA

The Agentic Enterprise Platform.

We are fast approaching a reality where AI agents are not just tools, but virtual employees.
The mandate for businesses is clear: adopt AI or fall behind.

Sena is the platform for this evolution, enabling you to build a custom ERP and the AI agents that powers it.

Our Mission

Custom ERPs

We automate the entire ERP implementation lifecycle.

Compose a custom ERP that fits you perfectly.

Virtual Employees

Build useful AI agents that live inside your system.

We don't just build agents, we also do full automated testing and finetuning.

Democratized Access

Zero technical skills required.

Whether you are a founder or a manager, you hold the brush. If you can describe it, you can build it.

How Sena Works

From conversation to a running system.

1 Discovery Agent

Talk to Sena in natural language.
It listens, interviews your team, and maps how the business actually works.
Produces a system blueprint before anything is built.

2 Builder Agent

Assembles your ERP and AI agents.
Pulls components from the Registry and customizes logic and integrations.
Results in a real, operational ERP.

3 Registry

A composable library of modules, agents, and integrations.
Built once, reused many times.
Foundations compound over time.

4 HITL SDK

Human In The Loop

Humans step in where AI falls short.
Experts guide.
Experts guide, correct, and adapt system behavior.
Judgment stays in the loop.

The Flywheel

Agents Improve

Agents learn from real execution and extrennes.
Reliability improves through use.

ERP Evolves

When operational flovs change, the ERP adapts.
New logic added:
No rewrite.

Registry Compounds

Implementers are eager to add trusted components.
Each system makes the next faster.

What We Believe

It feels increasingly likely that we are moving toward a world of abundance. As intelligence becomes more capable and more widely available, a post-scarcity future no longer feels theoretical.

Join us to build the future together.
